   7.2 Transitional provisions
   7.3 Approval by the rector
1. About the programme

1.1 Purpose of the Master’s programme

The MSc programme in International Development Studies and Global Studies is an interdisciplinary study programme consisting of two independent subjects, of which International Development Studies comprises subject 1 and Global Studies comprises subject 2.

Overall purpose

The purpose of a Master’s programme at Roskilde University is to:

1) Enhance the academic knowledge and skills of the student and boost his or her theoretical and methodological qualifications and skills, as well as independence at Master’s level,

2) Provide the student with thorough academic study through the use of advanced elements in the disciplines and methods of the academic area, including training in scientific work and methodology which further enhances the student’s proficiency in executing specialised professional work and participating in scientific development.

3) Qualify the student for further education, including a PhD programme.

The programme is organised as a full-time course of study, and requires that students complete or as a minimum participate in the study activities of each semester.

1.2 Language

The programme is presented in English. Some study programme elements and parts of the syllabus may be in other languages. Unless otherwise specified, the examination language is the same as the teaching language.

1.3 Admission requirements

See separate curriculum document.

1.4 Competency profile - academic and professional skills

The Study Board organises the programme in accordance with the programme’s object description, and thereby emphasises the development of the student’s knowledge, skills and competencies within:

An advanced theoretical and applied foundation in the interlinked political, cultural and economic processes relating to globalisation, inequality and processes of development in connection with the Global South. Emphasis is placed on understanding development in the context of globalisation, such as the significance of globalisation for conflict resolution, political stability and institutions of global governance. Emphasis is placed on understanding development across local, national, regional and international interrelationships. Students are encouraged to explore how processes of development are anchored in values, socio-economic inequality, power relations and international and local politics.

The combination Master’s programme is interdisciplinary, based on social science, political economy, geography, sociology/anthropology, area and environmental studies and international relations. Students learn to analyse processes of globalisation and development on the basis of these academic perspectives, in order to be able to explore the processes, challenges and possible future paths of development.

After graduation, students will understand development in new ways, and will have acquired the necessary problem-solving tools to understand and communicate in the ever more complex world in which we live.

The programme has been designed with a particular view to qualifying the student for work in: development organisations (national and non-governmental organisations), the private sector, consulting firms, universities and ministries.
Knowledge:

- Knowledge of the interlinked political, cultural and economic processes relating to globalisation, inequality and processes of development in connection with the Global South.
- Knowledge of the significance of globalisation for power relations, political stability and the institutions of global governance, plus insight into the global economy and current developments in global capitalism.
- Interdisciplinary insights into how relations of inequality are constructed and challenged, plus the functioning of the international political economy and its interaction with local, national and regional developments in the Global South.
- Theoretical and applied understanding of the interlinked political, economic and cultural processes that characterise specific developmental pathways, interventions and processes of globalisation.

Skills:

- Skills in identifying theoretical and methodological approaches to a particular academic work within the fields of International Development and Global Studies, comparing these methods, and indicating the significance of the underlying assumptions and conceptual frameworks.
- Skills in carrying out complex tasks (e.g. management and policy analyses), and in assessing, selecting and applying relevant theories and methods in order to solve these tasks.
- Skills in selecting and using appropriate communication and dissemination strategies (e.g. oral, written, accurate, meticulous and detailed communication).

Competencies:

- Competency to independently plan and carry out a complex task within a set time frame.
- Competencies in co-operating efficiently with others in a team.
- Competencies to utilise specialised technical knowledge in order to understand development challenges and processes of globalisation.
- Competency in initiating and implementing both discipline-specific and interdisciplinary cooperation, and in assuming a professional responsibility.
- Competency in communicating and disseminating research results to colleagues and a wider, non-expert audience.
- Competencies to take responsibility for one’s own learning and specialisation within International Development Studies and Global Studies, as well as the ability to critically reflect on one’s own professional position and role.

1.5 ECTS credits and duration

The programme corresponds to 120 ECTS. 60 ECTS corresponds to full-time studies for one year, and the programme thus has a standard ECTS rating of two years.

1.6 Title

Graduates of the programme are entitled to use the title Master of Science (MSc) in Social Sciences in International Development Studies and Global Studies.

The title in Danish is cand.soc. i Internationale udviklingsstudier og Globale studier.

1.7 Study Board and corps of external examiners

The programme is administered by the Study Board for International Studies.

The programme is affiliated with the corps of external examiners for International Development Studies. The study programme elements for Global Studies belong under the corps of external examiners for Politics, Society and Global Conditions.
1.8 Main area affiliation

The study programme belongs under the main area of Social Science.

The study programme elements for Global Studies belong under the main area of Social Science.

1.9 Credit

On the basis of an application by the student, the Study Board may approve that study programme elements passed as part of another Danish or foreign study programme at the same level may substitute for elements of the study programme at Roskilde University, in accordance with the Education Order. In its pre-approval, the Study Board must ensure that students meet the academic objectives of the curriculum in the subjects to be credited.

Pre-start credit

Upon application to enter the study programme, students are obliged to apply for credit for any study programme elements previously passed in a non-completed Master’s programme. The application must contain documentation of the passed study activities. The Study Board may approve that study programme elements passed as part of another Danish or foreign study programme at the same level may substitute for elements of the study programme, in accordance with the Order on Admission to Master’s Programmes.

Advance credit and final approval

As part of a study programme, students may apply to the Study Board for advance credit to take study programme elements at another university in Denmark or abroad. If the pre-approved programme elements are not offered by the host university, the student may apply for a modification of the approval.

The student is obliged to submit documentation showing whether or not the study programme elements have been passed. The documentation must be sent to Roskilde University. Final approval for advance credit can only be granted on the basis of the documentation. Once the documentation has been received, Roskilde University may administratively approve that the programme elements may be credited to the programme at Roskilde University.

The student must consent to Roskilde University obtaining the necessary information from the host university if the student cannot provide the documentation.

1.10 Mobility - study trips abroad and project-oriented internship programme

Mobility semester / mobility window

A student may apply to the Study Board for pre-approval to take a study period abroad or an internship which substitutes for individual, specified elements of the ordinary study programme.

Study periods abroad

Study periods abroad may occur via one of Roskilde University’s quality-assured exchange agreements, or via a foreign university, according to the student’s own choice.

Study periods abroad must normally constitute an entire semester of full-time studies at the foreign university (30 ECTS or the equivalent), and take place with the pre-approval of the Study Board.

Through pre-approval, the Study Board must ensure that students meet the academic objectives of the curriculum in the subjects to be credited. However, in the case of credit for study periods abroad, a certain degree of flexibility must be provided that allows the study period to take place even if a corresponding content is not available at the foreign university. Courses at a foreign university (with a total scope of 15 ECTS) could for example be approved as a project if they lie within the relevant academic area, even if the method and form are not entirely equivalent.

Project-oriented internship programme
The project-oriented internship programme, includes, inter alia, compilation of an internship project report. Once the application for pre-approval has been granted, the Head of Studies will assign a supervisor to the student. When processing the application, the Study Board must ensure that the student, through the project-oriented internship, achieves academic competencies which in scope and level correspond to the competencies that can be achieved through the ordinary study programme. The Study Board must at the same time ensure that the internship does not prevent the student completing any other required study activities during the semester in question.

Only one internship may be taken during the study programme.

2. Programme elements

2.1 Courses

The courses equip the student with systematic knowledge of key theories, methods, skills and practices within the academic areas of the study programme. The student must be given academic preparation to focus on issues relevant to project work, including the thesis. Courses may take the form of lectures, seminars, case work, laboratory exercises, workshops, etc.

2.2 Projects

Project work is problem-oriented, exemplary, participant-managed and group-based.

A project constitutes a time-limited and targeted academic process through which a problem is formulated, analysed and processed, such that it results in a tangible product. The product could for example be a project report, or one or more other products. The project takes its point of departure in an optional and independently formulated problem statement which, like the methods involved in the project, may be subject to continuous development throughout the project process.

The exemplary character of the project ensures that through the project work, students acquire knowledge and competencies that they can apply in a wider context than the project itself.

Students are free to choose the content of the project within the framework of the curriculum and the stated study objectives. The ability to critically evaluate the quality of one’s own efforts and knowledge base in relation to a given issue is an important objective for participant-directed and problem-oriented project work. The process is supported by one or more academic supervisors. The role of the supervisor(s) is to ensure that the group’s work meets the requirements of the curriculum.

The project work takes place in groups of 2-6 students. In special cases, the Head of Studies may grant a student permission to write a project alone.

2.3 Project-oriented internship

A student may apply to the Study Board for pre-approval to take a specially-designed, academically relevant, project-oriented internship which substitutes for individual, specified elements of the ordinary study programme. The semesters in which the internship may take place are stated in the curriculum. The project-oriented internship, includes, inter alia, the compilation of an internship project report. Once the application for pre-approval has been granted, the Head of Studies will assign a supervisor to the student. When processing the application, the Study Board must ensure that the student, through the project-oriented internship, achieves academic competencies which in scope and level correspond to the competencies that can be achieved through the ordinary study programme. The Study Board must at the same time ensure that the internship does not prevent the student completing any other required study activities during the semester in question.

2.4 Thesis

The thesis is a major, independent academic work which is exemplary, problem-oriented and participant-managed. The thesis constitutes a time-limited and targeted academic process through which a problem is formulated, analysed and processed. The thesis work is implemented as a thesis report.

The exemplary character of the thesis ensures that through the thesis work, students acquire knowledge, skills and competencies that they can apply in a wider context than the thesis itself.
Students are free to choose the content of the thesis within the framework of the curriculum and the stated study objectives. The ability to critically evaluate the quality of one’s own efforts and own knowledge base in relation to a given issue is an important objective for participant-directed and problem-oriented thesis work. The process is supported by one or more academic supervisors. The role of the supervisor(s) is to ensure that the thesis work meets the requirements of the curriculum.

In the thesis report, the student must document knowledge and skills in applying scientific theories and methods to work on a defined, academic and relevant issue. The student must demonstrate skills in analysing, categorising, discussing, reasoning, assessing and reflecting on a scientific basis, and must be able to select and critically evaluate the sources, literature, theory and methods used in the thesis. Through the thesis, the student must demonstrate the ability to communicate an academic study to peers and demonstrate the competency to initiate, manage and complete a long-term process of academic study and writing.

In general, the thesis work takes place in groups of up to six students. Students are entitled to carry out the thesis work individually.

### 3. Structure of the programme

#### 3.1 Schematic breakdown

#### 3.2 Recommended course of study

To help to ensure the quality and progression of the study programme and facilitate study planning for students, the following course of study is recommended:

**First semester: International Development Studies**
- Course in Theory in International Development Studies (5 ECTS)
- Course in Development Practice and Challenges (5 ECTS)
- Elective course: Advanced Methodology (5 ECTS)
- Edited Book Project (15 ECTS)

**Second semester: Global Studies**
- Foundation course in Global Studies (10 ECTS)
- Elective course: Advanced Methodology (5 ECTS)
- Project 1: Perspectives (15 ECTS)

**Third semester:**
**International Development Studies:**
4. The study programme

4.1 First semester

Purpose

The purpose of the semester is to build upon the knowledge that students have acquired about International Development Studies, corresponding to that taught in the Bachelor programme in International Studies or the equivalent, and to give students an in-depth theoretical and applied foundation in the core social science discussions that comprise the interdisciplinary field of International Development Studies.

Through two compulsory courses and an edited book project, students receive a rigorous and critical introduction to the perspectives of International Development Studies on the political, economic and cultural processes associated with inequalities and development processes. Students acquire insight into current developmental challenges as well as an overview of key theoretical and thematic discussions within the academic field of International Development Studies. In addition, students acquire skills in performing complex analyses. The students also acquire focused knowledge in specific areas of International Development Studies, and the ability to jointly write a brief and concise analysis within such an area. As a result, students gain skills in academic project and process management, formal and informal leadership, and the oral and written communication of research results.

Study programme elements in the first semester

The semester encompasses:

International Development Studies

- Course in Theory in International Development Studies (5 ECTS)
- Course in Development Practice and Challenges (5 ECTS)
- Elective course: Advanced Methodology (5 ECTS). The student chooses from among the methodology courses offered for International Development Studies in the semester in question. The following types of methodology course are available:
  - Advanced methodology course, concluding in a written assignment submitted seven days after the end of the course
  - Advanced methodology course concluding in 48-hour examination
  - Advanced methodology course concluding in portfolio
  - Advanced methodology course concluding in invigilated examination
  - Advanced methodology course concluding in written assignment plus poster examination
- Edited Book Project (15 ECTS)

</tbody>
</table>

| **Overall content** | The object of the course is to give students a thorough understanding of the theories, arguments and discussions that are central to International Development Studies. The course thereby aims to develop the students' ability to read critically, understand and discuss the primary texts in International Development Studies and related issues, with special focus on theory and its operationalisation, types of arguments, and how these fit into classic and modern discussions of development. In addition, the course helps students to select, discuss and combine different theories for use in written assignments. |

| **Teaching and working methods** | The course combines standard lectures with active participation on the basis of discussions of the syllabus, which will be set for each individual course session. During the semester, students write a theoretical assignment. |

| **Requirement for participation** | Students are expected to possess a basic knowledge of international development, corresponding to the Bachelor study programme in International Studies. |

| **Form of examination** | The examination consists of a written theoretical assignment in combination with a case study. On the basis of the fundamental literature, the assignment discusses a number of selected contributions to the academic debate. The written assignment, which is a combination of the theoretical assignment and a case study, must be submitted no later than one week after the final |
The maximum length of the assignment is 26,400 characters, including spaces. The size specifications include the cover, table of contents, bibliography, figures and other illustrations, but exclude any appendices. Papers that fail to meet the size specifications will be refused assessment, and one examination attempt will be deemed to have been used up.

**Re-examination:**

An examination question is set, and the student is given 48 hours to write the assignment. The maximum length of the assignment is 14,400 characters, including spaces. The size specifications include the cover, table of contents, bibliography, figures and other illustrations, but exclude any appendices. Papers that fail to meet the size specifications will be refused assessment, and one examination attempt will be deemed to have been used up.

**Knowledge**

- Knowledge of key debates and concepts in International Development Studies in relation to contemporary development practices and their results.
- Deeper understanding of the interrelated processes that characterise development efforts, from their planning to their implementation and results.
- Insight into the development-related techniques and procedures routinely used by public bodies, international organisations, multinational companies and NGOs.

**Skills**

- Skills in recognising important challenges to, and recurrent strategies used by, both development actors and target groups (or ‘recipients’) impacted by development initiatives.
- The ability to undertake policy analyses and formulate relevant policy recommendations.
- Strategic skills to engage in international discussions relating to global development issues.
### Overall content

The course in development practices and challenges focuses on applying various understandings of current development challenges. Challenges are analysed in an interdisciplinary manner from three different perspectives: political, cultural-sociological and political-economic. In this context, the course provides the student with practical knowledge and skills relating to work with international development issues, and discusses how to apply academic knowledge in practice and utilise practical experience in an academic context.

The course thus helps students to prepare for internship in the third semester by focusing on the link between academic knowledge and practical experience.

By drawing upon various categories of literature, the course familiarises students with the methodological tools required to analyse development policies and projects. Policy analysis consists of a systematic, empirical study of project and policy cycles, including problem definition, objectives, policy and project formulation, implementation and evaluation. Ultimately, these skills give the students a better understanding of the strengths, weaknesses and feasibility of specific development initiatives and interventions.

### Teaching and working methods

The course covers key development techniques and practices, including policy and project analysis – a tool to analyse the design, implementation and evaluation of development interventions. The various steps involved in key techniques and practices will be presented, and the students will work with these techniques in group exercises, using case studies. Finally, one or two current development challenges will be introduced from different perspectives. Efforts will be made to give students an opportunity to hear persons from a ministry, an international organisation, a multinational company and/or non-governmental organisations discussing their experiences, via a field trip to their workplaces and/or as guest speakers.

### Requirement for participation

It is expected that the student possesses a basic knowledge of international development corresponding to that taught in the Bachelor subject International Studies.

### Form of examination

The examination consists of an oral examination without preparation time. The examination questions are chosen by the examiner. The examination duration is 30 minutes, including assessment.

**Re-examination:**

Re-examination takes the same form as the ordinary examination.

### Group examination or individual examination

Individual examination

### Permitted examination aids

The use of notes and course materials is permitted.

### Assessment

Seven-point scale

### Moderation

One examiner and one co-examiner (internal).

<th>Lectures, exercises, student presentations, peer feedback and discussions. The course requires the student’s participation and involvement in the course sessions. A number of written assignments must be submitted during the course, which are distributed to the students, and on which they may provide each other with feedback. The number of assignments is determined by the course teacher and the Head of Studies, and must be approved by the Study Board before the course is offered. Deadlines for submission are determined by the course teacher at least two weeks before the start of the course, and are communicated to the course participants. The description of what each assignment must contain will be stated at least two weeks before the deadline for submission. It is not a prerequisite for taking the examination that the student has submitted assignments on a regular basis, but it will usually be an advantage. Part of the portfolio may thus contain elements relating to the teaching and the ongoing submissions, such as feedback.</th>

<p>| Overall content | • Research-related and professional premises for academic and scientifically-based, practice-oriented analyses. |
|                | • Procedures for the use of academic and/or scientifically-based, practice-oriented tools in research-related and professional contexts, respectively. |
| Teaching and working methods | Lectures, exercises, student presentations, peer feedback and discussions. The course requires the student’s participation and involvement in the course sessions. A number of written assignments must be submitted during the course, which are distributed to the students, and on which they may provide each other with feedback. The number of assignments is determined by the course teacher and the Head of Studies, and must be approved by the Study Board before the course is offered. Deadlines for submission are determined by the course teacher at least two weeks before the start of the course, and are communicated to the course participants. The description of what each assignment must contain will be stated at least two weeks before the deadline for submission. It is not a prerequisite for taking the examination that the student has submitted assignments on a regular basis, but it will usually be an advantage. Part of the portfolio may thus contain elements relating to the teaching and the ongoing submissions, such as feedback. |
| Preconditions for being allowed to take the examination | The student must hold two presentations during the course. The students are provided with feedback on their presentations. A condition for being allowed to take the examination is that the student has held two presentations in connection with the teaching. If the student is initially unable to hold the oral presentations, the student must give the oral presentations later in the course in order to be allowed to take the examination. |
| Form of examination | A portfolio consisting of a collected set of written assignments is submitted one week after the course completion. The total number of characters in the portfolio must lie in the range 12,000 – 31,200. The size specifications include the cover, table of contents, bibliography, figures and other illustrations, but exclude any appendices. Papers that fail to meet the size specifications will be refused assessment, and one examination attempt will be deemed to have been used up. The portfolio is assessed on the seven-point scale. A single, combined grade is awarded for the portfolio. Re-examination: A new date is set for the submission of a portfolio, the specific content of which is determined by the course teacher and communicated to the student at least three weeks prior to the submission date. The student is given three weeks to complete the assignment. The same size requirements apply as in the ordinary examination. |

### Learning outcomes / evaluation criteria

#### Knowledge
- Knowledge of academic and/or scientifically-based, practice-oriented methods, their use and relevance at advanced level.
- Understanding of and critical reflection on academic and/or scientifically-based, practice-oriented methods of social science research and their application in the future professions of students, such as in teaching, project management, consultancy, business management or research.

#### Skills
- Skills to carry out surveys and analyses using academic and/or scientifically-based, practice-oriented methods.
- Skills to evaluate and select methods in research and professional practice.
- Skills in communicating and discussing academic and/or scientifically-based, practice-oriented studies in a linguistic form that is correct, clear, technically precise, well-structured and well-argued.

#### Competencies
- Competency to co-operate with colleagues in applying various academic and/or scientifically-based, practice-oriented methods and forms of analysis to relevant issues in research and professional contexts.
- Competency to reflect on one’s own learning and responsibility for academic development.

### Overall content
- Research-related and professional premises for academic and scientifically-based, practice-oriented analyses.
- Procedures for the use of academic and/or scientifically-based, practice-oriented tools in research-related and professional contexts, respectively.

### Teaching and working methods
Lectures, exercises, student presentations, peer feedback and discussions.

### Preconditions for being allowed to take the examination
The course is examined by an oral examination, based on a written assignment set by the course teacher and a poster within the theme of the methodology course.

Both the assignment and the poster are compiled by groups of 2-6 students.
**Form of examination**

The maximum length of the written assignment is 21,600 characters, including spaces. The size specifications include the cover, table of contents, bibliography, figures and other illustrations, but exclude any appendices. Papers that fail to meet the size specifications will be refused assessment, and one examination attempt will be deemed to have been used up. The poster must be in poster format (2 x A2) or similar. The written paper is submitted at the conclusion of the course. The assignment will be refused examination if it exceeds the maximum size.

The poster is presented at the oral examination. The assignment and the poster are submitted (in digital form) at the end of the course. The poster must be in poster format (2 x A2) or similar. It is the student’s responsibility to print the poster. In addition to questions on the written report and the poster, the oral examination will also involve questions about the syllabus in general. Assessments and grades are awarded individually.

The students are examined in groups. The duration of the examination is increased by ten minutes for each student, i.e. two examinees: 20 minutes, three examinees: 30 minutes, etc. (excluding assessment time).

A single combined assessment is awarded for the written assignment and the oral examination.

Re-examination follows the same provisions as the ordinary examination, and a new written assignment and poster must be submitted.

### Overall content

In the edited book project, a group of students writes different book chapters on a common theme, resulting in an “edited book” as their joint product. Each semester, a broad theme will be selected.

The themes vary from semester to semester, but may include:

- Conflict
- Inequality
- Migration

The project represents an opportunity for students to write a different kind of
### Teaching and working methods

The edited book project is kick-started with a few lectures in the first two weeks of the semester which introduce students to the selected theme for the semester. This is followed by a group formation process, after which each group chooses a particular angle on the theme, which will come to constitute a chapter in the final product. Each group makes its own contribution to a joint introduction.

A small group of supervisors organises the writing process. The supervisors facilitate four half-day workshops during the semester. In connection with these workshops, there are fixed deadlines for the draft chapters that the groups are required to submit. The students provide each other with feedback on their drafts, and the supervisors can provide additional feedback and guidance to the groups. The supervisors also prepare short presentations to be held during the four workshops. The presentations form the basis for discussion of important aspects of the book project, e.g.: What are the components of a good introduction? How do you compile a multidisciplinary literature review? How should empirical data be presented in a chapter?

### Requirement for participation

Students are expected to possess a fundamental knowledge of international development corresponding to that taught in the Bachelor study programme in International Studies.

### Form of examination

Oral examination.

The oral examination is primarily based on the relevant chapter and the introduction, but students are expected to be able to answer questions covering the entire book. Each student gives a presentation on a self-selected issue relating to the project, of 2-3 minutes' duration per student. The presentation is co-ordinated with the other students in the group.

Each chapter may have a maximum length of 60,000 characters, including spaces. The size specifications include the cover, table of contents, bibliography, figures and other illustrations, but exclude any appendices. Papers that fail to meet the size specifications will be refused assessment, and one examination attempt will be deemed to have been used up. The size of the assignment is based on 2,400 characters (incl. spaces) per page, excluding the front page, table of contents, bibliography and any appendices.

Each chapter must be between a minimum of 45,000 characters, including spaces, and a maximum of 60,000 characters, including spaces. The size specifications include the cover, table of contents, bibliography, figures and other illustrations, but exclude any appendices. Assignments that fail to meet the size specifications will be refused assessment, and one examination attempt will be deemed to have been used up. Rejection of one chapter will not affect the other groups' possibilities to take the examination.

A single grade is awarded. In the assessment process, the written assignment and the oral examination are each given a weight of 50%.

**Re-examination:**

Re-examination takes the same form as the ordinary examination. Students are given an opportunity to revise the chapter and take an oral examination.

### Group examination or individual examination

Group examination
Permitted examination aids | All

Assessment | Seven-point scale
Moderation | One examiner and one co-examiner (internal).

### 4.2 Second semester

**Purpose**

The purpose of the second semester is to provide students with basic knowledge of the three topics: Global Politics, Global Sociology and Global Political Economy.

**Study programme elements in the second semester**

The semester encompasses:

**Global Studies**

- Foundation course in Global Studies (10 ECTS)
- Elective course: Advanced Methodology (5 ECTS). The student chooses from among the methodology courses offered for Global Studies for the semester in question. The following types of methodology course are available:
  - Advanced methodology course, concluding in a written assignment submitted seven days after the end of the course
  - Advanced methodology course concluding in 48-hour examination
  - Advanced methodology course concluding in portfolio
  - Advanced methodology course concluding in invigilated examination
  - Advanced methodology course concluding in written assignment plus poster examination
- Project 1: Perspectives (15 ECTS)

</tbody>
</table>

**Knowledge**

- Historically-based understanding of the meanings and practices of global political, sociological and economic issues.
- Knowledge of the central political discussions, sociological debates and discussions of political economy.
- Critical understanding of how political, social and economic power relations, as well as political and cultural identities, are constructed and challenged.

**Skills**

- Skills in identifying and locating key theoretical and conceptual debates in the research fields of global politics, global sociology and global political economy.
| Learning outcomes / evaluation criteria | • Skills in utilising a large body of literature and relating it to global issues, with a critical approach.  
• Skills in communicating complex global issues and current events, both orally and in writing. |
| Competencies | • Competencies to master new study areas and academic concepts.  
• Competencies to formulate clear and precise arguments on this basis.  
• Competencies to work in multicultural and multilingual environments. |
| Overall content | The foundation course in Global Studies examines how power relations and political and cultural identities are constructed and challenged, and covers key theoretical and conceptual discussions in global politics, global sociology and global political economy. The course provides a historical foundation for understanding today's global situation through a study of global political, social and economic processes since the 19th century, and their subsequent development up to the 21st century. |
| Teaching and working methods | The foundation course combines standard lectures with active participation on the basis of discussions of the syllabus set for each individual course session. |
| Requirement for participation | Students are expected to possess a fundamental knowledge of Global Studies corresponding to the level taught in the Bachelor study programme in International Studies. |
| Preconditions for being allowed to take the examination | Compulsory assignment:  
In order to be permitted to take the examination, students must submit a written assignment during the semester.  
The individual written assignment is based on one or more questions prepared by the course teacher. The questions relate to the content of the first half of the course. The questions are issued to students after the first six to eight course sessions, and students are given one week to write the assignment.  
The maximum length of the assignment paper is 14,400 characters, including spaces. The size specifications include the cover, table of contents, bibliography, figures and other illustrations, but exclude any appendices. Papers that fail to meet the size specifications will be refused assessment, and one examination attempt will be deemed to have been used up. The written paper will be assessed as Pass/Fail. The student will be given feedback.  
If the assignment is not submitted before the end of the course, it must be submitted during the re-examination period. |
| | The course concludes in an oral examination:  
Following the conclusion of the course, students take an oral examination, which has a duration of thirty minutes including assessment. Students answer examination questions and relate critically to the other content of the course. Students will receive a list of possible questions in advance, which they can use to prepare for the examination. The student is not told which questions from the

### Teaching and working methods

Lectures, exercises, student presentations, peer feedback and discussions. The course requires the student’s participation and involvement in the course sessions.

A number of written assignments must be submitted during the course, which are distributed to the students, and on which they may provide each other with feedback. The number of assignments is determined by the course teacher and the Head of Studies, and must be approved by the Study Board before the course is offered. Deadlines for submission are determined by the course teacher at least two weeks before the start of the course, and are communicated to the course participants. The description of what each assignment must contain will be stated at least two weeks before the deadline for submission. It is not a prerequisite for taking the examination that the student has submitted assignments on a regular basis, but it will usually be an advantage. Part of the portfolio may thus contain elements relating to the teaching and the ongoing submissions, such as feedback.

### Form of examination

The portfolio, which consists of a collected set of written assignments, is submitted one week after the course completion. The total number of characters in the portfolio, including spaces, must lie in the range 12,000 – 31,200.

The size specifications include the cover, table of contents, bibliography, figures and other illustrations, but exclude any appendices. Papers that fail to meet the size specifications will be refused assessment, and one examination attempt will be deemed to have been used up.

The portfolio is assessed on the seven-point scale. A single, combined grade is awarded for the portfolio.

Re-examination: A new date is set for the submission of a portfolio, the specific content of which is determined by the course teacher and communicated to the student at least three weeks prior to the submission date. The student is given three weeks to complete the assignment. The same size requirements apply as in the ordinary examination.

The portfolio is assessed on the seven-point scale. A single, combined grade is awarded for the portfolio.

Re-examination: A new date is set for the submission of a portfolio, the specific content of which is determined by the course teacher and communicated to the student at least three weeks prior to the submission date. The student is given three weeks to complete the assignment. The same size requirements apply as in the ordinary examination.

Learning outcomes / evaluation criteria

**Knowledge**

- Knowledge of academic and/or scientifically-based, practice-oriented methods, their use and relevance at advanced level.
- Understanding of and critical reflection on academic and/or scientifically-based, practice-oriented methods of social science research and their application in the future professions of students, such as in teaching, project management, consultancy, business management or research.

**Skills**

- Skills to carry out surveys and analyses using academic and/or scientifically-based, practice-oriented methods.
- Skills to evaluate and select methods in research and professional practice.
- Skills in communicating and discussing academic and/or scientifically-based, practice-oriented studies in a linguistic form that is correct, clear, technically precise, well-structured and well-argued.

**Competencies**

- Competency to co-operate with colleagues in applying various academic and/or scientifically-based, practice-oriented methods and forms of analysis to relevant issues in research and professional contexts.
- Competency to reflect on one’s own learning and responsibility for academic development.

**Overall content**

- Research-related and professional premises for academic and scientifically-based, practice-oriented analyses.
### Procedures for the use of academic and/or scientifically-based, practice-oriented tools in research-related and professional contexts, respectively.

### Teaching and working methods
- Lectures, exercises, student presentations, peer feedback and discussions.

### Form of examination
- The examination consists of an individual, written methodology assignment that discusses and problematises various possible methodological approaches. The assignment is set by the course teacher no later than the fifth course session.
- The assignment must be submitted no later than one week after the end of the course. The maximum length of the assignment is 26,400 characters, including spaces.
- The size specifications include the cover, table of contents, bibliography, figures and other illustrations, but exclude any appendices. Papers that fail to meet the size specifications will be refused assessment, and one examination attempt will be deemed to have been used up.
- Re-examination: Re-examination follows the same rules as the ordinary examination. The student is given fourteen days to complete the assignment.

</table>

| Overall content                         | The object of the project is to achieve greater knowledge of a topic within the scope of the foundation course. |
|                                        | The project comprises the following three component elements: |
|                                        | 1. Identify and categorise the main theoretical approaches in the academic literature on the subject, then compare them and point out the significance of the various ways of understanding and conceptualising this topic in the literature. |
|                                        | 2. Identify and categorise the most important methodological approaches within the academic literature on the subject, then compare them and point out the significance of the various methods for the result achieved. |
|                                        | 3. Identify and categorise gaps in the literature and unanswered questions. |

| Teaching and working methods            | The project work takes place in groups of 2-6 students. The project groups receive guidance in the form of workshops. |

| Requirement for participation           | The oral group examination is based on the project. Each student is invited to give a presentation on an issue relating to the project, of 2-3 minutes’ duration per student. The presentation is co-ordinated with the other students in the group. Students are examined on the basis of the entire project report, in such a way as to allow for individual assessment. The length of the project must be between a minimum of 57,600 characters, including spaces, and a maximum of 76,800 characters, including spaces, irrespective of the number of students in the project group. The size specifications include the cover, table of contents, bibliography, figures and other illustrations. The grade awarded is based on a combined assessment of the project report and the oral examination. A single overall grade is awarded. |

### 4.3 Third semester

#### Purpose

**International Development Studies**

The purpose of the semester is for students to study advanced theoretical, empirical and methodological debates within the field of International Development Studies. The semester has two components, consisting of:

- Elective course: Advanced study course (10 ECTS), in which students acquire advanced and specialised knowledge within a particular area of International Development Studies, and the ability to carry out complex analyses.
- Elective course: Advanced methodology course (5 ECTS), in which students learn how quantitative and qualitative methods are applied in connection with development issues.

**Global Studies**

The purpose of the third semester in Global Studies is to expand the students’ knowledge, methodological and theoretical skills and competencies within a theme in Global Studies (Global Politics, Global Sociology, Global Political Economy), and to provide them with a thorough introduction to advanced methodology. Students gain skills in selecting theories within a specific academic area, and are enabled to communicate and discuss theories and empirical results in connection with the specialisation course. The advanced methodology course provides students with knowledge of the key concepts in qualitative and quantitative data collection.

#### Study programme elements in the third semester

The semester encompasses:

**International Development Studies:**

- Elective course: Advanced Study Course (10 ECTS)
- Elective course: Advanced Methodology (5 ECTS) The following types of methodology course are available:
  - Advanced methodology course, concluding in a written assignment submitted seven days after the end of the course
  - Advanced methodology course concluding in 48-hour examination
  - Advanced methodology course concluding in portfolio
  - Advanced methodology course concluding in invigilated examination
  - Advanced methodology course concluding in written assignment plus poster examination

Students choose from among the advanced study courses and methodology courses offered by the Study Board each semester.

**Global Studies:**

- Elective course: Advanced Study Course (10 ECTS)
- Elective course: Advanced Methodology (5 ECTS) The following types of methodology course are available:
  - Advanced methodology course, concluding in a written assignment submitted seven days after the end of the course
  - Advanced methodology course concluding in 48-hour examination
  - Advanced methodology course concluding in portfolio
  - Advanced methodology course concluding in invigilated examination
  - Advanced methodology course concluding in written assignment plus poster examination

The activities of the third semester may, upon application to the Study Board, be replaced by a project-oriented internship (15 ECTS) in International Development Studies or Global Studies. The activities of the third semester may, upon application to the Study Board, be replaced by a project-oriented internship (15 ECTS) in International Development Studies or Global Studies.
Board, be replaced by a project-oriented internship programme in both International Development Studies and Global Studies (30 ECTS).

Only one internship may be taken during the study programme.

<td>Individual oral examination on the basis of the syllabus.</td>
</tr>
<tr>
<td></td>
<td>The oral examination has a total duration of 60 minutes, divided between 30 minutes for each participant.</td>
</tr>
</tbody>
</table>
Form of examination

The form of examination consists of minutes of preparation time (including time to draw a question) and approximately 30 minutes for the oral examination, including assessment. The course teacher sets 8-15 examination questions which in sum cover the syllabus. The student draws two random questions at the start of the examination. These two questions form the starting-point for the examination, in which the student, after preparation time, presents and discusses the questions on the basis of the syllabus.

In the examination, questions may be asked relating to any part of the entire course syllabus. All examination aids are permitted in the preparation room. In the examination room, only notes written during the preparation time are permitted. The course teacher may however permit particular examination aids to be present in the examination room, such as prepared hand-outs or the like.

Re-examination takes the same form as the ordinary examination.

Learning outcomes / evaluation criteria

Knowledge

- Specialised knowledge of a specific topic within International Development Studies.
- Advanced knowledge of academic and methodological debates relating to the topic.

Skills

- Skills in choosing relevant theories in order to examine a selected area.
- Skills in selecting and critically applying relevant theories and methods.
- Skills in communicating and discussing theories and empirical results.

Competencies

- Competency to take responsibility for and reflect on one’s own learning and that of colleagues by actively participating in group work, presentations and discussions.
- Competencies to independently select and utilise academic literature that is relevant to a specific issue.
| Overall content | The object of the advanced study course is to provide students with advanced knowledge within a specific research area. At least two advanced study seminars are offered each semester. The themes may include:  
  - Modern theories of the state in the Global South  
  - Governance and economic transition in a globalised world  
  - Migration and citizenship  
  - Policies and practices in global health  
  - Social, political and economic aspects of climate change |
|-----------------|--------------------------------------------------------------------------------------------------|
| Teaching and working methods | The course is based on lectures, but will also encompass other forms of teaching and work, including group work, exercises, student presentations, peer feedback and field trips, as well as other practical activities.  
During the course, an assignment is written on the basis of a question handed out at the start of the course. |
| Form of examination | The examination is in two parts:  
1. Assignment written during the course. The first part of the examination is an answer to a question handed out at the start of the course. The maximum length of the assignment paper is 14,400 characters, including spaces. The size specifications include the cover, table of contents, bibliography, figures and other illustrations, but exclude any appendices. Assignments that fail to meet the size specifications will be refused assessment, and one examination attempt will be deemed to have been used up. The assignment is submitted during the final course session.  
2. The second part of the examination is a 48-hour written assignment, submitted after the final course session. The maximum length of the 48-hour assignment is 14,400 characters, including spaces. The size specifications include the cover, table of contents, bibliography, figures and other illustrations, but exclude any appendices. Papers that fail to meet the size specifications will be refused assessment, and one examination attempt will be deemed to have been used up.  
The assignments will be refused examination if one or both of them exceed the maximum size. A single overall grade is awarded. The two assignments have equal weight in the assessment. Failure to submit the first assignment on time will result in the student not being allowed to take the 48-hour examination, and one examination attempt will be deemed to have been used up.  
Re-examination:  
The student must submit the first assignment within two weeks of the conclusion of the course. Previous assignments cannot be reused, and new questions may be set.  
The second assignment in the examination is a 48-hour written assignment, and is taken in the re-examination period.  
Re-examination otherwise has the same size requirements as the ordinary examination. |

### Learning outcomes / evaluation criteria

**Knowledge**
- Knowledge of academic and/or practice-oriented methods, their use and relevance at advanced level.
- Understanding of and critical reflection on academic and/or scientifically-based, practice-oriented methods of social science research and their application in the future professions of students, such as in teaching, project management, consultancy, business management or research.

**Skills**
- Skills to carry out surveys and analyses using academic and/or scientifically-based, practice-oriented methods.
- Skills to evaluate and select methods in research and professional practice.
- Skills in communicating and discussing academic and/or scientifically-based, practice-oriented studies in a linguistic form that is correct, clear, technically precise, well-structured and well-argued.

**Competencies**
- Competency to co-operate with colleagues in applying various academic and/or scientifically-based, practice-oriented methods and forms of analysis to relevant issues in research and professional contexts.
- Competency to reflect on one’s own learning and responsibility for academic development.

### Overall content
- Research-related and professional premises for academic and scientifically-based, practice-oriented analyses.
- Procedures for the use of academic and/or scientifically-based, practice-oriented tools in research-related and professional contexts, respectively.

### Teaching and working methods
- Lectures, exercises, student presentations, peer feedback and discussions.
Form of examination

The examination consists of a 48-hour written assignment. The assignment is set by the course teacher.

The maximum length of the assignment paper is 14,400 characters, including spaces. The size specifications include the cover, table of contents, bibliography, figures and other illustrations, but exclude any appendices. Papers that fail to meet the size specifications will be refused assessment, and one examination attempt will be deemed to have been used up.

Re-examination follows the same provisions as the ordinary examination, and a new written assignment must be submitted.

### Learning outcomes / evaluation criteria

#### Knowledge
- Knowledge of academic and/or scientifically-based, practice-oriented methods, their use and relevance at advanced level.
- Understanding of and critical reflection on academic and/or scientifically-based, practice-oriented methods of social science research and their application in the future professions of students, such as in teaching, project management, consultancy, business management or research.

#### Skills
- Skills to carry out surveys and analyses using academic and/or scientifically-based, practice-oriented methods.
- Skills to evaluate and select methods in research and professional practice.
- Skills in communicating and discussing academic and/or scientifically-based, practice-oriented studies in a linguistic form that is correct, clear, technically precise, well-structured and well-argued.

#### Competencies
- Competency to co-operate with colleagues in applying various academic and/or scientifically-based, practice-oriented methods and forms of analysis to relevant issues in research and professional contexts.
- Competency to reflect on one’s own learning and responsibility for academic development.

### Overall content
- Research-related and professional premises for academic and scientifically-based, practice-oriented analyses.
- Procedures for the use of academic and/or scientifically-based, practice-oriented tools in research-related and professional contexts, respectively.

### Teaching and working methods
Lectures, exercises, student presentations, peer feedback and discussions. The course requires the student’s participation and involvement in the course sessions.

A number of written assignments must be submitted during the course, which are distributed to the students, and on which they may provide each other with feedback. The number of assignments is determined by the course teacher and the Head of Studies, and must be approved by the Study Board before the course is offered. Deadlines for submission are determined by the course teacher at least two weeks before the start of the course, and are
communicated to the course participants. The description of what each assignment must contain will be stated at least two weeks before the deadline for submission.

It is not a prerequisite for taking the examination that the student has submitted assignments on a regular basis, but it will usually be an advantage. Part of the portfolio may thus contain elements relating to the teaching and the ongoing submissions, such as feedback.

Preconditions for being allowed to take the examination

The student must hold two presentations during the course. The students are provided with feedback on their presentations. A condition for being allowed to take the examination is that the student has held two presentations in connection with the teaching. If the student is initially unable to hold the oral presentations, the student must give the oral presentations later in the course in order to be allowed to take the examination.

Form of examination

A portfolio consisting of a collected set of written assignments is submitted one week after the course completion. The total number of characters in the portfolio must lie in the range 12,000 – 31,200. The size specifications include the cover, table of contents, bibliography, figures and other illustrations, but exclude any appendices. Papers that fail to meet the size specifications will be refused assessment, and one examination attempt will be deemed to have been used up.

The portfolio is assessed on the seven-point scale. A single, combined grade is awarded for the portfolio.

Re-examination: A new date is set for the submission of a portfolio, the specific content of which is determined by the course teacher and communicated to the student at least three weeks prior to the submission date. The student is given three weeks to complete the assignment. The same size requirements apply as in the ordinary examination.

<tr>
<td>Preconditions for being allowed to take the examination</td>
<td>The course is examined by an oral examination, based on a written assignment set by the course teacher and a poster within the theme of the methodology course. Both the assignment and the poster are compiled by groups of 2-6 students. The maximum length of the written assignment is 21,600 characters, including spaces. The size specifications include the cover, table of contents, bibliography, figures and other illustrations, but exclude any appendices. Papers that fail to meet the size specifications will be refused assessment, and one examination attempt will be deemed to have been used up. The poster must be in poster format (2 x A2) or similar. The written paper is submitted at the conclusion of the course. The assignment will be refused examination if it exceeds the maximum size. The poster is presented at the oral examination. The assignment and the poster are submitted (in digital form) at the end of the course. The poster must be in poster format (2 x A2) or similar. It is the student’s responsibility to print the poster. In addition to questions on the written report and the poster, the oral examination will also involve questions about the syllabus in general. Assessments and grades are awarded individually.</td>
</tr>
<tr>
<td>Form of examination</td>
<td></td>
</tr>
</tbody>
</table>
The students are examined in groups. The duration of the examination is increased by ten minutes for each student, i.e. two examinees: 20 minutes, three examinees: 30 minutes, etc. (excluding assessment time).

A single combined assessment is awarded for the written assignment and the oral examination.

Re-examination follows the same provisions as the ordinary examination, and a new written assignment and poster must be submitted.

<td>Internship project</td>
</tr>
</tbody>
</table>
The problem statement of the internship project must relate to theoretical or empirical issues from the field of the subject, which the internship at the host organisation (or its activity) provides an opportunity to illuminate, but may otherwise be freely chosen by the student. See also the description of the internship project under 'Form of examination'.

Requirement for participation

If the written assignments are not submitted, the student may not take the oral examination and will be deemed to have been absent.

Form of examination

Individual oral examination on the basis of the internship project. The finished internship project, which is compiled individually, must contain:

1. An executive summary with a maximum length of 4,800 characters, including spaces. The size specifications include the cover, table of contents, bibliography, figures and other illustrations, but exclude any appendices. Assignments that fail to meet the size specifications will be refused assessment, and one examination attempt will be deemed to have been used up. The assignment must relate to the content of the project and the main points to which a reader should pay particular attention.

2. A main section, including a mandatory literature review providing an overview of the latest research in the field of the internship project (state-of-the-art literature review).

The project must have minimum length of 45,600 characters including spaces, and a maximum length of 60,000 characters including spaces. The size specifications include the cover, table of contents, bibliography, figures and other illustrations, but exclude any appendices. Papers that fail to meet the size specifications will be refused assessment, and one examination attempt will be deemed to have been used up.

The grade awarded is based on a combined assessment of the project report and the oral examination. A single overall grade is awarded.

Re-examination:
Re-examination takes the same form as the ordinary examination. Students are given an opportunity to revise the project.

Group examination or individual examination
Individual examination

Permitted examination aids
None

Assessment
Seven-point scale

Moderation
One examiner and one co-examiner (internal).
### Learning outcomes / evaluation criteria

- **Knowledge of how an employment-relevant organisation functions internally as an internship venue, including its tasks, workflows and decision-making processes.**
- **Knowledge of the requirements and conditions applying to the specific assignment in the organisation in which the internship takes place.**
- **Insight into the practical utility of the theoretical, methodological and analytical approaches and concepts of International Development Studies and Global Studies.**
- **Knowledge of the latest academic literature relevant to illuminating the topic of the internship project.**

### Skills

- **Skills in working with an academically-relevant issue within the activities and field of the internship host, in connection with a project.**
- **The ability to combine academic insights (theories, methods, approaches) from the subjects and link these with practical issues and tasks at the internship host.**
- **Skills in carrying out specific tasks allocated by the internship host.**
- **Skills in linking academic insight and knowledge gained from both subjects to the practical issues and dynamics of a workplace.**

### Competencies

- **Competency to independently compile an internship project, including planning and managing the workflow.**
- **Competency to relate practical knowledge and experience to the academic theories, concepts and methods of the subjects.**
- **Competency to manage multiple parallel tasks (at the internship venue as well as tasks for the University).**
- **Competency to take responsibility for one’s own academic and professional development.**
- **Responsibility to act professionally in a working community at a workplace.**

### Overall content

Learning during the internship takes place through a mixture of practical work, reflections on the encounter between theory and practice, and independent compilation of the internship report. The writing of the internship report takes place under the guidance of an internship supervisor.

Students are themselves responsible for securing an internship host and for the practical implementation of the internship, including ensuring that both their tasks for the internship host and their obligations to the University are fulfilled. The internship must be approved by the Study Board before it is commenced. It is expected that the semester’s work will be distributed as 3/4 for the internship host and 1/4 for the University (equivalent to approximately 540-600 hours for the internship and about 200 hours of university work). The intern’s main
activities must be described, and must lie within the field of both subjects. The student has obligations towards both subjects. Overall, International Development Studies receives an internship project, and Global Studies receives a number of assignments.

Obligations to International Development Studies:

Internship project

The problem statement of the internship project must relate to theoretical or empirical issues from the field of International Development Studies, which the internship at the host organisation (or its activity) provides an opportunity to illuminate, but may otherwise be freely chosen by the student. Students are encouraged to focus on issues in which aspects of Global Studies can also be brought into play.

See also the description of the internship project under ‘Form of examination’.

Obligations towards Global Studies:

Global Studies receives a concluding written project report consisting of three reflection assignments. A supervisor and an examiner will be appointed for the assignments.

Form of examination

There are two separate and independent examinations for International Development Studies and Global Studies, respectively.

International Development Studies:

Individual oral examination on the basis of the internship project. The finished internship project, which is compiled individually, must contain: An executive summary with a maximum length of 4,800 characters, including spaces. The executive summary must relate to the content of the project and the main points to which a reader should pay particular attention. A main part, including a mandatory literature review providing an overview of the latest research in the field of International Development Studies dealt with by the internship project (state-of-the-art literature review). The literature for the project consists of a total of 650 pages, selected by the student in collaboration with the supervisor. The project must have minimum length of 45,600 characters including spaces, and a maximum length of 60,000 characters including spaces. The size specifications include the cover, table of contents, bibliography, figures and other illustrations, but exclude any appendices. Papers that fail to meet the size specifications will be refused assessment, and one examination attempt will be deemed to have been used up.

Global Studies:

Individual written examination, on the basis of an internship project with reflection assignments. The internship project must contain the following:

1. Reflections on (a) the use of social scientific methods at the internship venue, and (b) a discussion of either how the internship venue could make more optimal use of various methodological approaches, or an example of how the internship venue could organise an assignment using various social scientific methods, together with their strengths and weaknesses in the light of the special interests of the internship venue. The reflections may have a maximum size of 14,400 characters, including spaces.
2. Reflections on theories within Global Studies that are particularly relevant to the internship venue and/or the field of the internship venue. The choice of theories must be argued, with reference to scientific articles/texts. The scope of the referenced literature must be at least 300 pages. The reflections may have a maximum size of 14,400 characters, including spaces.

3. Memorandum for internship venue. The subject of the memorandum may be freely chosen by the student, but must be relevant to the internship venue and lie within the subject field of Global Studies. The memorandum might for example consist of a policy brief, a reasoned recommendation for future areas of action, or a reasoned proposal for organisational change. The memorandum may have a maximum size of 12,000 characters, including spaces.

The size specifications include the cover, table of contents, bibliography, figures and other illustrations, but exclude any appendices. Papers that fail to meet the size specifications will be refused assessment, and one examination attempt will be deemed to have been used up.

Internship projects that fail to meet the size specifications will be refused assessment, and one examination attempt will be deemed to have been used up.

<tbody>
<tr>
<td>Individual oral examination on the basis of the syllabus. The oral examination has a total duration of 60 minutes, divided between 30 minutes of preparation time (including time to draw a question) and approximately 30 minutes for the oral examination, including assessment. The course teacher sets 8-15 examination questions which in sum cover the syllabus. The student draws two random questions at the start of the examination. These two questions form the starting-point for the examination, in which the student, after preparation time, presents and discusses the questions on the basis of the syllabus.</td>
</tr>
<tr>
<td>In the examination, questions may be asked relating to any part of the entire course syllabus. All examination aids are permitted in the preparation room. In the examination room, only notes written during the preparation time are permitted. The course teacher may however permit particular examination aids to be present in the examination room, such as prepared hand-outs or the like.</td>

|                                                                     | • International mobility and information flow                           |
|                                                                     | • International political movements and social change                    |
|                                                                     | • International civil society, law and defence                           |
|                                                                     | • Contentious identities and new global players                          |
|                                                                     | Global Political Economy:                                                |
|                                                                     | • Work and globalisation                                                 |
The course is based on lectures, but will also encompass other forms of teaching and work, including group work, exercises, student presentations, peer feedback and field trips, as well as other practical activities.

The examination is in two parts:

1. Assignment written during the course. The first part of the examination is an answer to a question handed out at the start of the course. The assignment is submitted during the final course session. The maximum length of the assignment paper is 14,400 characters, including spaces. The size specifications include the cover, table of contents, bibliography, figures and other illustrations, but exclude any appendices. Papers that fail to meet the size specifications will be refused assessment, and one examination attempt will be deemed to have been used up.

2. 48-hour written assignment. The student is given 48 hours to write the second part of the examination. The assignment is set after the final course session. The maximum length of the assignment paper is 14,400 characters, including spaces. The size specifications include the cover, table of contents, bibliography, figures and other illustrations, but exclude any appendices. Papers that fail to meet the size specifications will be refused assessment, and one examination attempt will be deemed to have been used up.

The assignments will be refused examination if one or both of them exceed the maximum size. A single overall grade is awarded. The two assignments have equal weight in the assessment. Failure to submit the first assignment on time will result in the student not being allowed to take the 48-hour examination, and one examination attempt will be deemed to have been used up.

Re-examination:

The student must submit the first assignment within two weeks of the conclusion of the course. Previous assignments cannot be reused, and new questions may be set.

The second assignment in the examination is a 48-hour written assignment, and is taken in the re-examination period.

Re-examination otherwise has the same size requirements as the ordinary examination.

Group examination or individual examination: Individual examination

Permitted examination aids: All

Assessment: Seven-point scale

Moderation: One examiner (None)

4.4 Fourth semester - Thesis

The thesis is written on the basis of subject 1 in the study programme, and may draw upon elements of the programme’s subject 2. The student may thus choose to write an interdisciplinary thesis covering the entire programme.
The thesis corresponds to 30 ECTS credits.

The thesis is written in the teaching and examination language of the programme. The Head of Studies must approve the thesis statement. The thesis must be accompanied by a summary in a foreign language. If the thesis is written in a foreign language other than Norwegian or Swedish, the summary may be written in Danish.

The thesis must be located in the final study year of the Master’s programme.

Knowledge

- Research-based knowledge of selected academic areas, and an understanding of and reflection on the position of the student’s own thesis study in the academic field.
- Knowledge of the academic genre and the academic target group for the thesis.

Skills

- Skills in applying and mastering scientific theories and methods in work on a defined and relevant academic issue.
- Skills in identifying scientific issues.
- Skills in analysing, categorising, discussing, arguing, reflecting and evaluating on a scientific basis.
- Skills in critically evaluating and selecting sources, literature, theory and methods.
- Skills in argumentation and participation in academic debate.
- Skills in writing in accordance with the applicable standards for academic texts, and for an academic target audience.

Competencies

- Competency to independently initiate, manage and complete a long-term process of academic study and writing.
- Competency to identify and take responsibility for one’s own academic and linguistic development and specialisation.

Size requirements and academic requirements

If the student, as part of a thesis, develops a design, product or concept, or otherwise contributes to a production or design process, this shall be included in the overall assessment of the thesis. This activity must be documented in a manner which enables it to be assessed. The summary must contain an illustration.

Scope

The thesis may be written individually or in groups of 2-6 students. During the thesis work, students receive guidance to an extent specified by the Study Board, and a thesis seminar is held.

Size specifications for the thesis:

One person: The thesis must be between a minimum of 144,000 characters, including spaces, and a maximum of 192,000 characters, including spaces.

Two or more participants: The thesis must be between a minimum of 192,000 characters, including spaces, and a maximum of 240,000 characters, including spaces.

Theses that fail to comply with the size specifications will be refused assessment, and one examination attempt will be deemed to have been used up.

The size specifications for the thesis, including spaces, include the cover, table of contents, summary, bibliography, figures and other illustrations, but exclude any appendices.

In addition to the academic content, the assessment of the thesis also takes into account the student’s writing and spelling skills, which are weighted at 10%. The Study Board may grant exemptions from this requirement in the case of students who can document a specific and relevant disability, unless the assessment of writing and spelling skills is a significant part of the purpose of the examination.

The summary will be incorporated into the assessment of the thesis at a weight of 5%.

For the thesis, the form of assessment is:
In accordance with the rules of the University, the Study Board may stipulate that one of the following assessment forms is always used, or that the student may choose the assessment form:

- Assessment on the basis of the thesis alone – but see below on non-individualised group theses.

OR

- Combined assessment of the thesis and an oral examination.

The general requirements regarding these two forms of examination are described below. The Study Board’s choice of examination form is stated in a subsequent section.

**Written examination**

If the thesis is written by a group, it must be individualised on submission if one or more of the students in the group so wishes and has the possibility to have the thesis assessed on the basis of the thesis dissertation alone. The individualisation must be genuine and show which students have been mainly responsible for the individual sections. The introduction, conclusion and summary, in Danish and other languages, should be encompassed by joint responsibility.

If the thesis is not sufficiently individualised an oral thesis examination must be held instead, which will take its starting-point in the thesis. The grade awarded is in this case based on a combined assessment of both the thesis and the oral examination. Students who have worked together on a thesis to the extent that it cannot in practice be individualised must register for an oral thesis examination.
Oral examination

The examination is an individual examination for students who have compiled the thesis individually, or who have requested an individual examination. Other thesis examinations shall be held as a group examination for the participants in the thesis work.

The examination is based on the students’ thesis. During the examination, each student has the opportunity to give a brief oral presentation. The examination otherwise takes the form of a conversation between the students, the examiner and the moderator. The student must be examined on the basis of the whole thesis. An individual assessment is undertaken of each student’s performance.

The assessment consists of a combined assessment of the thesis and the oral presentation.

At the examination, up to ten minutes are allocated per student for a self-chosen, prepared presentation based on the thesis. The examination otherwise takes the form of a conversation between the student(s), the examiner and the moderator, under the direction of the examiner. During the examination, it must be ensured that all examinees are given an equal opportunity to demonstrate their knowledge of the joint thesis and their academic standard in relation to the assessment criteria. Students are examined on the basis of the entire thesis, in such a way as to allow for individual assessment.

For the oral examination, the student(s) may bring a written synopsis for the oral presentation, either in print or in digital form presented on the student’s own computer. The written synopsis must not exceed one page in length and is not submitted in advance. If the examinee brings a written synopsis in printed form, copies must be given to both examiners at the start of the examination. In addition, the student(s) may bring other presentation material, such as a product, either in physical form or in digital form presented on the student’s own computer.

The examination takes the form of a conversation between the students, the examiner and the moderator. Students are examined on the basis of the entire thesis, in such a way as to allow for individual assessment. As the basis for the examination, each group gives a presentation of 3-5 minutes’ duration on a specific theme relating to the project work.

The Study Board’s choice of examination form

The Study Board has determined that the examination form shall be a combined assessment of the thesis and an oral examination or a written examination, according to the student’s own choice.

The thesis is assessed according to the seven-point scale, with external moderation.

5. General regulations

General regulations for examinations, tests and other assessments are set out in the University’s Registration and Examination Regulations, the Executive Order on University Examinations and the Grading Scale Order, etc. Rules governing appeals relating to examinations and other assessments are set out in the Executive Order on University Examinations. See Roskilde University’s Rules and Regulations.

5.1 Registration/de-registration and re-examination

The rules governing registration, deregistration, re-examination and possible exemptions are set out in the University’s Registration and Examination Regulations, which are included in Roskilde University’s Rules and Regulations.

5.2 Special examination facilities

The University Board may provide special examination facilities for students with physical or psychological disabilities if the University assesses that this is necessary in order to secure equal opportunities for these students in the examination situation. The provision of such facilities must not result in an alteration of the examination standard.

5.3 Academic selection criteria

If there are more students who wish to take a given course, etc., than there are places for, the following academic selection
criteria will be applied:
Places will be allocated on a first come, first served basis. Students who are required to take the course will be guaranteed a place.

6. Exemptions and appeals

6.1 Exemptions
In exceptional cases, the Study Board may grant exemptions from such rules in the curriculum as are determined by the Study Board alone.

6.2 Appeals
The decisions of the Study Board pursuant to this curriculum may be brought before the Rector if the appeal relates to legal questions. The time limit for the submission of appeals is two weeks from the date on which the decision is announced.

In addition, decisions of the Study Board relating to the rejection or partial rejection of an application for credit for previously passed Danish study programme elements, or for advance credit for Danish or foreign study programme elements, may be brought before a credit transfer appeals committee, if the appeal relates to the academic assessment, in accordance with the Executive Order on Credit Transfer Appeals Committees. The time limit for the submission of appeals is two weeks from the date on which the decision is announced.

Decisions of the Study Board relating to the rejection or partial rejection of an application for credit for previously passed foreign study programme elements may moreover be brought before the Qualifications Board, if the appeal relates to the academic assessment, in accordance with the Act on Assessment of International Educational Qualifications, etc. The time limit for the submission of appeals is four weeks from the date on which the decision is announced.

Decisions of the Rector concerning legal questions may be brought before the Danish Agency for Science and Higher Education.

7. Approval

7.1 Approval by the Study Board
Study Board for International Studies, date: 31 October 2017

Discussed with the chairperson of the external examiners, 28 September 2017.

7.2 Transitional rules
Amendments as of 1 September 2016

International Development Studies:
Students enrolled prior to 1 September 2016, and who have not taken an academic seminar during their first semester, must take methodology course I.

Global Studies:
Students enrolled prior to 1 September 2016, and who have completed parts of the three foundation courses in the programme’s first semester, must take the Foundation Course in Global Studies and be examined under the curriculum of 1 September 2015, with amendments as of 1 February 2016.

This means that the student will be examined in the theme that has not previously been passed (Global Politics, Global Sociology or Global Political Economy).
7.3 Approval by the rector

Approved by Rector Hanne Leth Andersen, date: 8 June 2018
