

Cand.soc./MSc in Global and Development Studies

” How do we combat
global inequality?

Global and Dev Studies

Are you passionate about understanding global development trends? Enthusiastic about analysing global social, political, and economic actors, relations, and institutions, including their histories and contemporary manifestations? And do you want to learn how to address these issues? Then Global and Development Studies is an MA programme for you.

elopment

Global and Development Studies offers cutting-edge academic training in analysing, assessing, and addressing current global changes and how they affect people's lives around the world. Questions of justice, inequality, conflict, and sustainability as well as their effects on states, markets, and civil society will be central to your studies.

You will acquire knowledge about global and development processes across local, national, regional, and international levels and learn how these processes are manifested differently in specific sites around the world. You will also acquire practical skills that enables you to analyse and critically reflect on issues and problems, such as climate change, conflict and peace-making, development aid, disaster management, economic transformation, human rights, inequality, mobility, social movements, and sustainability.

The Master's programme is interdisciplinary, combining the fields of global and development studies. It draws on international relations, political economy, political science, sociology, and anthropology. You will meet the interdisciplinary approach in your taught classes and apply it actively in your project work.

>>>>>

Global and Dev Studies – continued

Mandatory classes provide an academic common ground while elective classes allow you to pursue your specific theoretical and methodological interests. The development of your own academic profile is particularly ensured through the project work where you and your team of fellow students investigate a problem of your own choosing. Under supervision you will design, prepare, and execute a project similar to a research project.

elopment

The project work trains your use of theory, social science methods, and analytical approaches and equips you with collaborative and leadership competences. It also assures that you are well versed in the art of communicating your results in writing and defending them orally at the exam.

By joining the Global and Development Studies programme, you will be part of a culturally and linguistically diverse study environment. This gives you essential social competences for pursuing a professional career in an international context.

Content

Year 1		Year 2	
1 ST SEMESTER	2 ST SEMESTER	3 ST SEMESTER	4 ST SEMESTER
Foundation Course in Global and Development Studies [Course] 10 ECTS	Current Global and Development Challenges and Solutions [Course] 10 ECTS	Choose A, B or C A: Current Global and Development Challenges and Solutions 10 ECTS Policy Analysis 5 ECTS Advanced Methods Course 5 ECTS Current Global and Development Challenges Project 10 ECTS or B: Current Global and Development Challenges and Solutions 10 ECTS Policy Analysis or Advanced Methods Course 5 ECTS Project-oriented Internship 15 ECTS or C: Projectoriented Internship 30 ECTS	Master thesis 30 ECTS
Project Management and Evaluation [Course] 5 ECTS	Power, Conflict and Justice [Course] 5 ECTS		
Sustainability, Development and Inequality [Course] 5 ECTS	Advanced Methods Course [Course] 5 ECTS		
Project linked to Sustainability, Development and Inequality [Project] 10 ECTS	Project in Economic and Social Contestation 10 ECTS		

Note, that this is an example of a recommended course of study. Individual students' courses, projects, internships and accredited studies abroad may vary in relation to the above. Students starting in February follow the activities in a slightly different order. You can see the range of courses currently offered by Roskilde University at study.ruc.dk.

1st

SEMESTER

Your 1st semester consists of three mandatory courses and a project. The foundation course sets the scene, while the smaller courses each delve into specific topics. The course on 'Sustainability, Development, and Inequality' is linked to the project. While the theme for your project is given, you and your team are free to explore any problem within this frame. This allows you to start specializing and building your own academic profile theoretically, analytically, and methodologically.

2nd

SEMESTER

The 2nd semester allows for further specialization as you choose both an elective specialization course and a methods course. You also follow the mandatory class on Project Management and Evaluation. The semester project studies a problem within the theme of Economic and Social Contestation. The project work entails teamwork, supervision, and seminar sessions that develop your ability to give and receive structured and constructive peer-feedback.

3rd

SEMESTER

Your 3rd semester gives you three options.

A: To further deepen your theoretical and methodological specialization by doing an elective 10 ECTS specialization course and an elective 5 ECTS methods course and a 10 ECTS project.

B: To take a specialization course, the policy analysis course and do a 15 ECTS internship (incl. a report).

C: To carry out a full 30 ECTS internship. An internship allows you to test your skills and knowledge in practice. Note that internships must be planned ahead of time.

4th

SEMESTER

You spend the 4th semester researching and writing your master's thesis either alone or in a team. You may collaborate with an external partner on an issue that allows you in-depth theoretical, methodological, and analytical specialization while providing the partner with the analysis of a pertinent problem. The thesis work is supported by workshops and seminars and supervised by lecturers.

Form of Study

Through your education, you get the opportunity to create your own individual education profile and your own independent specialization in accordance with the idea of the problem-oriented, interdisciplinary and project-oriented teaching method at Roskilde University.

THE STUDY FORM COMBINES ENGAGEMENT, THEORY AND PRACTICE

Your study activities are rooted in

- Problem-oriented project group work
- Courses organized as classroom-teaching, where the focus is on theories, methods, and analytical approaches that help you grasp concepts and empirical matters. Presentations, discussions and debates are typical interaction forms between teacher and student.

The project work and supervision are prioritized at Roskilde University. We also prioritize that you gain experience with the production and processing of empirical data as well as the practical application of theories, methods and analytical approaches.

All master's programmes offer project-oriented internships and / or studies at other universities at home and abroad with credit transfer.

Project Examples

The problem-oriented project work (including the final thesis) gives you unique opportunities to shape your academic profile and investigate problems of your specific interest. Through the project work you acquire practical experience of applying theories and learning about their explanatory power. You practice your methodological skills as well as analytical capacities and become versed in communicating your results. Here are examples of problems you could study in the project work:

- Women, peace and security: Does women's inclusion in peacekeeping processes lead to more sustainable outcomes?
- Private sector participation in achieving the Sustainable Development Goals: Can the market do what governments cannot?
- Can disaster lead to development? A comparative study of post-disaster development in two lower middle-income countries hit by hurricanes
- Decolonizing development aid: Analysing North-South donor-recipient partnerships and power imbalances
- Arctic just transition: Companies, the EU, and indigenous people – mining prospects vs climate changes
- Playing a modern game of slavery? A case study of the use of forced labour in Qatar
- Transit-migration in Central America: The political economy of migration in pandemic times
- Stalemate in global governance: Is the world order eroding or becoming more pluralist?

What project would you write if you studied Global and Development Studies?

Competences

Upon completing the Global and Development Studies programme you will be able to appropriately select theories, methods, and analytical strategies allowing you to assess social, political, and economic processes that characterize global and development challenges. More concretely you will have acquired competences to:

- Plan and manage projects
- Conduct evaluations
- Gather, prepare, and present data to shed light on an issue
- Write up policy briefs
- Give policy advice
- Handle complex and unpredictable tasks
- Initiate and execute interdisciplinary and professional cooperation

Career

Policy analyst | private company

Official (EU/international team) | ministry

Public affairs consultant | private company

Policy advisor on peace and security | UN

Foreign service officer | embassy

International project manager | NGO

Data analyst | private company

Researcher | think tank or university
